Contact Mr. R.B. Riley or Mr. M.J. Lynch

2. Project title Lumphanan

3. Applicants' organisation  
& financial structure

Please see this Company's letter dated 6th August, 1971.

4. Outline of proposed project,  
including geological considerations (see plan attached)

...

This area is entirely underlain by granite and migmatites and is a likely environment for molybdenum, wolfram and tin; zinc and lead are subsidiary metals sought.

5. Work programme and costs  
of project

A programme of stream sediment geochemistry has already been carried out with anomalous areas revealed for Mo, Pb and Zn which will require follow up stream geochemistry on a closer spacing. Soil geochemistry will be done if results warrant.
